MEMORANDUM FOR: Director, OJCS

SUBJECT : CIRIS 74 Input Data

1. The Research and Analysis Branch of the DCI/IC/MPRRG has a requirement for the bulk of CIRIS 74 data inputs to be key punched during the month of April. This requirement involves about 6,000 cards derived from Resource Data Inputs which are due before 15 April and some 25,000 cards from Targeted Resources Data due between 20-29 April. Input data for this task will be formatted on standard CIRIS forms #2812 and 2812a (copies attached).

2. In light of a need to exercise this data in National Intelligence Program reviews scheduled to begin early in May, and recognizing that all of the inputs may not be available at one time, the IC Staff is prepared to defray overtime costs that may be necessary to meet the timing requirement.

3. It is my understanding that the foregoing has been discussed with OJCS/Ops. Accordingly, your acceptance of the requirement and estimate of possible overtime costs is requested.
